Profile

Aspiring Full Stack Developer with a strong foundation in web development, object-oriented programming, and database management. Recently completed an intensive 330-hour coding bootcamp, gaining hands-on experience in C# .NET, JavaScript, Angular, and SQL. Adept at problem-solving, teamwork, and adapting to new technologies. Transitioning from a diverse professional background, bringing resilience, attention to detail, and strong communication skills to the tech industry.

Technical Skills

- Programming Languages: C# (.NET), JavaScript, TypeScript
- Frontend: HTML5, CSS3, Angular
- Backend: .NET (C#), Node.js
- Databases: SQL Server, NoSQL
- Tools & Methodologies: Git, Agile (Scrum), UX/UI Essentials

Language

- Portuguese (native)
- English (advanced)

Personal Interests

- Brazilian Jiu-Jitsu
- Cybersecurity
- Capture the Flags

Projects

Business Website for Local Entrepreneur

Designed and developed a responsive one-page site showcasing services, portfolio, and contact info.

- UI/UX: Clean, modern design with smooth animations.
- Tech: HTML, CSS, JS (interactive elements, form validation).
- Features: Mobile-friendly layout, contact form, embedded map.
- Applied LINQ for data manipulation and enhanced UI with CSS.
- Used GitHub for version control and followed Agile methodologies.

Tech Stack: C# .NET | MVC Core 6 | SQL Server | Entity Framework Core | Razor Views | .NET Framework 4.7.2 | LINQ | CSS | GitHub

Web Development Project - Primavera Academy Web Scraping

Developed a responsive web app with user authentication, REST API (JSON Server), and an admin panel.

- Front-End: HTML, CSS (Roboto, FontAwesome), JS (dynamic UI, animations, modals).
- Back-End: User management (login, registration, session storage, role-based access).
- Features: Search bar, responsive menu, carousel, hover effects, cookie consent.

Tech Stack: HTML | CSS | JS | JSON Server

E-commerce Page in Angular - H&M Store Web Scrapping

A fully functional e-commerce platform developed using Angular. The website supports user authentication, product management, and a responsive design optimized for various screen sizes. The UI elements are styled using Bootstrap and FontAwesome icons. This project also integrates a JSON Server to simulate the API and manage the database of products and users.
Tech Stack: Angular | TypeScript | HTML | CSS | Bootstrap | FontAwesome | JSON Server

Education & Certifications

PRIMAVERA Business Software Solutions – RE_Start Developer Bootcamp (330 hours) | 2024

- Key Topics: C# .NET, JavaScript, Angular, SQL Server, UX/UI, Agile Methodologies
- Final Grade: 7.5/10

Instituto Britânico (English Certification) | 2003
12th Grade (High School Diploma) | 2004

Professional Experience

Automotive Cutting Technician 2015– 2024

ZF Group

- Operated and maintained cutting machinery, ensuring precision and efficiency.
- Worked in a fast-paced environment, meeting deadlines and quality standards.
